SCIOPERI ALLA FIAT - 1968

**MEXICO**

**Strikes at FIAT**

The 120 thousands workers of FIAT struck three times in 15 days' time.

To FIAT, the most large Italian motor-industry, workers haven't striken for long time and also for this the strikes were important for the country.

The claims of the workers are the regularization of working-time and the contraction of job-works.

In fact while the FIAT's production increased very much the rewards of job-works are stopped at June 1961, and working-hours are unbearable.

As always the police intervened brutally against workers and against students who brought their solidarity to striking-workers.

But in spite of the intimidations of the owner and the police provocations another strike is proclaimed for saturday. The struggle infact goes on.

Rome 17th. April 1968
