

THE KAMCHATKA VOLCANO

In Kamchatka, in the famous Kluchevskaya group of volcanoes, a new volcano has come to life with unusually long eruption. For over a month burning hot gas, steam, slag and stones are being thrown out to a height of 7-8 km. Scientists of the Kamchatka Institute of Volcanology had predicted the beginning of eruption a week ahead. This allowed geophysicists, geochemists, seismologists to begin their observations from the very first hours of the life of the volcano. Our cameraman was there with the scientists. The study of the processes of eruption will enrich the knowledge of volcanologists about the dynamics of processes which take place in the depths of the Planet.

NADEJDA PAVLOVA

The Bolshoi Theatre is preparing to celebrate its 200th anniversary. Each year new dancers are admitted into the famous ballet company. This year the Bolshoi ballet admitted Nadejda Pavlova, Laureate of the International Contest of Ballet Dancers. She had graduated from the Perm Choreographic School. Under the guidance of People's Actress of the Soviet Union Marina Semjonova Nadejda Pavlova has started rehearsing.

MILITARY PARADE AND DEMONSTRATION

The Red Square is majestic and stately on the day of the traditional military parade. In his address Marshal A. Grechko, Minister of Defence of the USSR, spoke of the strengthening economic and defensive might of our country. On behalf of the CPSU Central Committee and the Government of the USSR the Minister congratulated the men of Soviet Armed Forces, the working people of our country and foreign guests upon the holiday of the 58th Anniversary of the Great October Socialist Revolution. He said that Soviet Armed Forces put forward all efforts and knowledge to the great cause of serving their Socialist state and are always ready in contact with the forces of fraternal states of the Warsaw Pact to fulfill their patriotic and international duty.

The ceremonial parade of forces begins.

The legendary Banner of Victory, which had been raised over the Reichstag in Berlin in 1945, is at the head of the parade. 30 colours of Soviet Army units which had outstanding merits in the fight for liberty and independence of our country are a symbol of 30 years which we have lived through in peace. Cadets of Military Academies, where military specialists of high qualification, commanders of all types of forces are being educated, are on the march. The armament of the Soviet Army and the Soviet Fleet has been modernised many times in recent years. Now they are equipped with the most perfect armaments. The Soviet Forces are devoted to the people and the Party and reliably defend the achievements of October.

Youth enters the Red Square. Soviet youth continues with honour the cause of their fathers, inherits peace on earth, the traditions of international fraternity and solidarity. Our youth participates in the great deeds of the five year plan. Muscovites reported that they had fulfilled their five year plan in the volume of industrial production. 300,000 foremost workers have completed their personal five year plans, and their number constantly increases. 1975 is Women's Year. The movement of women throughout the world for equality, their participation in anti-imperialist and national liberation struggle is ardently supported by Soviet people.

On this joyous festive day, - said L.I. Brezhnev, - the main Square of our country and the squares in other cities are filled by thousands of working people. They demonstrate the unity of people around their Leninist Party, around the Soviet Government, their pride of their achievements and their readiness towards new labour victories.

HIGH VOLTAGE POWER LINE

The construction of a high voltage power line of 750,000 V tension is nearing completion in Ukraine. The bridge of Mikhail Zhadanyukh needs only 45 minutes to raise a 50m high support. One of the important operations at the assembling of the line is rolling out the electric wires. Experienced tractor drivers Mikhailenko and Kabal fulfill this operation with great skill. The assemblers are competing for worthy accomplishments towards the 25th Congress of the CPSU. They stretched the line across the Yuzhny Bug River in only three days, which is ahead of schedule. 320 km of the line have already been put into current.

SAIRA FISHING

The autumn fishing season has begun at the Kurilsk bank. The main peculiarity of saira fishing is that it is done at night. The fish are attracted by bright light. Saira is popular on the international market and is being exported to many countries. One of the saira conserving factories is situated on Shikotan Island. The workers of the factory have already fulfilled their five year plan ahead of schedule. The canning factories of Yuzhno-Kurilsk District have taken an obligation to produce a hundred million cans of conserves by the end of the year.

SEAL ISLAND

Sunshine is a rare guest at the small Tyulenii Island in the cold Okhotsky Sea. But gulls-kaires and seals find the island quite hospitable. Extensive research work for the studying of these valuable fur sea animals is carried out by the workers of the Pacific Research Institute of Fishing and Oceanography. This year 10,000 young seals received such signs of identification.
