

DOLORRES IBARRURI

These shots had been filmed almost 40 years ago. The image of Passions-ria, the fiery revolutionary, lives in the memory of fighters for the liberty of the people of Spain. Having been forced to leave her country Ibarruri did not lose hope to see a new democratic Spain. Today the struggle between forces of democracy and reaction in Spain is becoming more and more acute. After 40 years the Communist Party has left the underground. Hundreds of political prisoners have been set free. During the decades of heroic struggle of Spanish Communists in difficult conditions of the underground and fascist repressions Dolores Ibarruri had remained a symbol of this struggle. Now Dolores Ibarruri is returning to Spain. She was seen off at the airport by Suslov, member of the Politbureau of the CPSU CC, and Ponomarev, alternate member of the Politbureau of the CPSU CC. Among those at the airport is Nikolaeva-Tereshkova, Chairman of the Committee of Soviet Women. Dolores Ibarruri is returning to Spain to participate once again in active struggle. She is confident of the victory of democracy in her country, and is determined to fight side by side with Spanish Communists for the victory of Socialism in Spain.

THE NUREKSK HYDRO POWER STATION

The assembling of the fifth hydro-aggregate of the Nureksk Hydro Power Station has begun ahead of schedule, on the eve of May Day. The task has been assigned to the brigade of Laureate of the State Prize of the USSR Anatoly Shilnikov, one of the initiators of the "Workers' Relay" emulation drive. In the jubilee year builders of the station are striving to put two hydro-aggregates under industrial load, which is considerably ahead of schedule. The "Workers' Relay" means an emulation drive of enterprises-suppliers of the Nureksk Hydro-power Station, its transport section and assemblers, it is a relay of labour in which all stages of work are being passed on from hand to hand. Workers of the project aim to construct the 300 meter high dam as quickly as possible in order to supply water to the fertile lands of Middle Asia Republics.
