

OLYMPIC COURSE

Ancient Tallin- the capital of the future Olympic sailing regatta. The construction is in full swing in the city as well as in the harbour Pirita. The Olympic sailing centre is being built. But training and competitions are going on here. The strongest sportsmen master the travers of Olimpiad-80. One of the best veterans, the Olympic champion Valentin Rankin is among them. The 18-year old twins Jury and Vasilii Kerayachkin, the European champions, are also training here. The hospitable Tallin awaits the yachtsmen-participants of Olimpiad-80.

CHAMPION BECOMES A COACH

Yanis Lusia, the famous javelinthrower, the olympic champion, officer of the Soviet Army, bids farewell to the big sport. Lusia won 12 times at the country's championships, four times- at the European championships, three times stood at the olympic rostrum. The javelin, thrown by the hand of Yanis Lusia, twice crossed the line of the world record! He has the awards of all degrees of sports glory. His javelin, Lusia passes as a abton of Soviet school of javelin throwing to his pupil Michael Munde. Now Aynis Lusia is the coach of the army sports club, he prepares a new generation of olympic sportsmen. We hope the young generation of athletes, and among them Michael Munde, prepare properly for the coming Olimpiad-80 in Moscow.

ICEBREAKER "ARCTICA" REACHES THE NORTH POLE

You are seeing unique film shots. The most powerful in the world ice-breaker - the Soviet nuclear-powered vessel "Arctica" - the first in history broke through the many meter thick ice of the Arctic Ocean and reached the North Pole. The nuclear-powered ice-breaker was under command of the well-known Arctic Sea captain Kuchiev. Guzhenko, Minister of Merchant Marine, directed this historic voyage. This was the very first time that a sea vessel in active sailing reached the very peak of the globe. Soviet science and technology have achieved a new outstanding victory. A dream cherished by many generations of gallant seafarers and Polar explorers has come true. In honour of this event a memorial plaque was lowered to the ground of the ocean. The country warmly greeted the heroes. This historical voyage Murmansk - North Pole - Murmansk has been completed. The accomplishment was dedicated by Polar explorers to the 60th anniversary of Great October.

REACTOR

The builders of an oil-refinery in Omsk have accomplished a complex engineering task - to raise and install a 700-ton reactor of a petroleum hydro-cracking. The reactor was built and tested at a Sverdlovsk plant and the lifting device - by experts of Moscow and Tallin. The operation is remote-controlled. The experts devoted their achievement to the 60th jubilee of the Socialist Revolution.
